## SGM-200H

Handheld system for conductive and non-conductive fluids, even with the suspended material presence (<10g/l; <Ø1mm)
Measure range $<0.2 \mathrm{~m} 3 / \mathrm{h}$ to $>400000 \mathrm{~m} 3 / \mathrm{h}$
Accuracy: $\pm 1 \%$
Clamp on IP67 sensors also for high temperatures and sensors on metric frame

Pipe Range DN20 to DN4000
Datalogger via SD card
LCD colour display
Battery life: 48h

The SGM-200H flowmeters operate on the ultrasonic pulses transit time difference principle. The great advantage is the mechanical installation, because it is not necessary to cut the pipe. The sensors are simply clamped on the outer pipe surface, for this reason the pressure and the liquid aggressiveness to be measured are not a problem for the flowmeter. The system measures in a bidirectional way and is suitable for clean or slightly dirty liquids
